

Cairns, North Queensland, Australia Fundiving The Great Barrier Reef

The diving

The Great Barrier Reef is a Marine Park and World Heritage area. It is recognized as one of the world's most unique and amazing marine spectacles and extends for 2300 kilometers along the northeastern coast of Australia. It consists of about 2900 individual reefs and covers an area the size of the United Kingdom. Its ecosystem supports the greatest concentration of life on this planet with its resident marine life including 1,500 species of fish, 350 different kinds of coral, 4000 species of mollusks and 10,000 species of sponges. It also provides breeding areas for humpback whales, sea turtles, dugong and seabirds. Hundreds of species of algae, including seaweeds, also live on the reef as a vital part of the reef system.

The best way to explore the diving on the reefs for the certified diver is to jump on a 3 day 2 night trip. The trips depart Cairns 6 times per week, offers up to 11 dives (2 night dives) spread out on a selection of the 16 exclusive sites over the trip duration. These sites have been selected for their extravagance of marine life and excellent visibility. You'll see some of the best the reef has to show.

Fundiving The Great Barrier Reef

This is only a selection of the many dive sites represented on this particular destination. The diving is dictated by the safeness of the environment.

Pellowe Reef

A small isolated reef located close to the edge of the continental shelf. For this reason access to the reef is very weather and tidal dependent. The reef drops away very quickly at places to 30m and stronger currents can be present as well. This site offers divers an exciting wall dive and one great swim through. The majority of the dives will be in depths between 5 to 20m. Being closer to the shelf large pelagic fish can be sighted along with the more regular sightings of schools of chevron barracuda, numerous sea cucumbers and nudibranchs.

Milln Reef

Milln Reef offers a number of exciting dive sites such as Whale Bommie, Petaj Mooring, Swimming Pools I, Swimming Pools II and the Three Sisters to name a few. The dive site at Petaj is home to resident turtles and white tip reef sharks. At the Swimming Pools you can expect to see schools of diagonally banded sweetlips and nudibranchs to name a few. Milln reef offers excellent wall dives and swim-through's and is great for night diving. Some of the walls are full of sleeping parrot fish in their mucus sacks, turtles and barracudas and the occasional bull ray. Whale bommie provides you with a good dive in depths exceeding 20m. A great site to dive at all times.

Thetford Reef

Thetford Reef is made up of numerous coral bommies where you can experience some very exciting wall dives and cool swim-through's. This reef is home to many soft and hard corals like staghorn and plate coral and an incredible abundance of marine life. Look for the giant clams, butterfly fish, damsels and angelfish. Access to the reef is very weather and tidal dependent.

Flynn Reef

Flynn reef is one of the most popular reefs to dive and will offer the novice to the very experienced diver plenty of memorable dives. The boat has moorings at a number of the well known dive sites at Flynn reef such as Tracy's Bommie, Gordon's Mooring, Tennis Court and the Coral Gardens. We could describe them all, but instead we suggest you go check them out yourself, it makes them a lot easier to remember!
