The diving

Panglao is seriously one of the best places to dive in the Philippines that offers it all! The dive crew are highly professional, the equipment is tip top and the atmosphere is relaxed and super friendly! Not to mention, that the house reef is just steps away from the dive center which gives unbeatable convenience and is PACKED with life!

Besides the amazing shore diving, the crown jewels of the region's reefs - Balicasag and Pamilican Islands - are just short boat rides away from the dive center. Here you will find incredible wall diving, teeming with life! Think turtles cruising past, schools of fish in every direction, and vibrant coral gardens. And when you're ready for more? Huge schools of fish, and the kind of visibility that makes you want to stay underwater forever. And if you are really lucky, you'll be swimming with the majestic whaleshark! (it's a plankton feeding shark, google it, you want to see this incredible creature!)

This is only a selection of the many dive sites represented on this particular destination. The diving is dictated by the safeness of the environment.

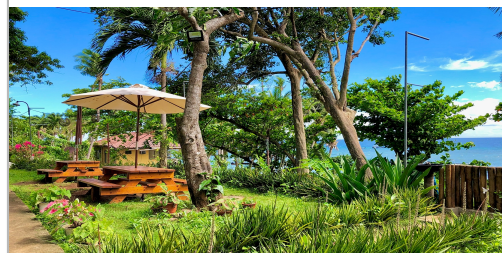

One of the best reefs in the Philippines is located less than 1 kilometer from the shop's front door on Panglao Island. At one of the many dive sites here, you can see colorful hard and soft corals descending along a dramatic wall. Witness breathtaking reefs, vibrantly-colored schooling animals like butterflyfish, angelfish, damselfish, camouflaged critters like blue-ring octopus, moray eels, scorpionfish, razorfish, ghost pipefish over a dozen species of nudibranch, turtles, sea snakes and more.

Arco Point: This site, suitable for all divers, is also known as "Hole in the wall" due to a small tunnel that begins at a depth of 5 meters and ends in the wall at a depth of 16 meters (the depth varies a couple of meters depending on the tide). The wall ends at 20 meters on a sandy slope beautifully decorated with isolated patches of black sun coral.

Throughout the dive we will find a vast number of soft corals, and on sunny days, the colors and light effects will make this one of your favorite dives. Don't forget to look around; a whaleshark might be diving with you!

Garden Eel: This dive site is placed right in front of the dive shop! You start the dive on the reef top at around 3-5 meters and then you leave the gorgeous coral garden descending through the wall to a depth of up to 25 meters depending on your certification level. This is the beginning of a sandy slope where at the bottom a large group of shy garden eels will hide as we approach them. Along the wall, in its cracks and small caves reside huge amounts of macro life: warty frogfish, ghost pipefish, shrimp, spider crab, wide variety of nudibranch and even three types of clownfish!

Balicasag Island: A coral haven for large and small creatures, is located just 12 kilometers from the dive center, around 30-minutes by boat. You can see vibrant corals and marine life along sloping reefs which circle the small round island. This marine sanctuary is protected from fishing and limits the number of divers per day permitted in the area. On a wall dive or a sloping reef, you'll have opportunities to see rare black corals, large fauna like green sea turtles and schools of jackfish, and diverse macro life like colorful and wonderfully weird nudibranch.
